PROJECTS

LIFE ENHANCER API

Graduation project: this application is designed to provide users with a comprehensive approach to maintaining a healthy lifestyle through the combination of healthy food, a good workout, and access to medical professionals if necessary, it has a food Spoonacular API, and provides REST endpoints to use,

BARTER API

·Barter is an application for trading goods with each other, similar to the ancient times when trade began as a barter system in which people exchanged one object for another, I built a RESTful API with NodeJS, ExpressJS, and MongoDB.

BOOK STORE API

·Books Store with Node JS This is a simple books store built with NodeJS, ExpressJS, and PostgreSQL. The application allows users to view books and applies CRUD operations on books

COURSES

DATABASE FUNDAMENTALS
